

# GETTING STARTED WITH TANIUM

## COURSE DESCRIPTION

This course introduces the Tanium platform's unique architecture and benefits, along with the key functionality of its Core modules, including asking questions, analyzing data, and connecting with external destinations. You will also receive a brief preview of additional Tanium modules available to support more advanced Endpoint Management and Endpoint Risk & Security use cases.

This course features real-world scenarios, hands-on practice scenarios, and interactive knowledge checks.

## DELIVERY OPTIONS

Instructor-Led  
Training (ILT)

Virtual  
Instructor-Led  
Training (VILT)

Web-Based  
Training (WBT)

## ADDITIONAL RESOURCES

- [Tanium Solutions & Bundles](#)
- [Tanium Knowledge Base](#)
- [Tanium Resource Center](#)

### Delivery options and duration

ILT/vILT: 8 hours | WBT: 2-3 hours

### Prerequisites

None.

### Target audience

This course is intended for anyone looking to build on their Tanium knowledge of core Tanium features and functions.

### Registration information

This training course is free of charge for current Tanium customers. However, the Tanium Learning Center access is protected, and use of an enrollment key is required for all first time users.

Please click [here](#) to learn more about how to access this training on our Tanium Learning Center.

## COURSE OBJECTIVES

- Explain Tanium's unique linear chain architecture
- Create basic queries to gather information about your environment
- Deploy actions to enact changes on endpoints
- Generate reports and visualize information
- Connect with external destinations
- Identify additional Tanium modules to support a wide variety of workflows and use cases

## COURSE OUTLINE

### THE TANIUM PLATFORM

- What is Tanium?
- The Tanium ecosystem
- Deployment types
- The Tanium Console
- Customizing the Console
- Module Overview pages
- Role-based access control
- Log in to and navigate the Tanium Console

### INTERACT

- What is Interact?
- Asking questions
- Question results
- Drill down and merge
- Interact content
- Deploying actions
- Packages
- Action types
- Computer and action groups
- Scheduled actions and action history

### TANIUM REPORTING

- What is Reporting?
- Working with reports

### TANIUM TRENDS (LEGACY)

- What is Trends?
- Working with Trends boards
- The Trends Gallery

### TANIUM SOLUTIONS

- Extending the power of Tanium
- Next-level solutions: Asset Discovery and Inventory
- Next-level solutions: Client Management
- Next-level solutions: Sensitive Data Monitoring
- Next-level solutions: Vulnerability Management
- Next-level solutions: Investigation and Remediation
- Solution area summary
